

CHINO OMUSON

Los Angeles, CA | (323) 835-2956 | chinoomuson216@gmail.com

PROFESSIONAL SUMMARY

Dedicated and detail-oriented Research Professional with a strong foundation in healthcare operations, behavioral science, and AI-driven study execution. With hands-on experience conducting in-person research sessions for multiple AI companies, I support the development and refinement of emerging AI models by collecting, validating, and managing high-quality multimodal datasets. I excel in engaging participants, coordinating complex research workflows, and ensuring strict adherence to study protocols, regulatory standards, and data-quality requirements. My background spans behavioral therapy, clinical documentation, public health analytics, and AI data operations, allowing me to bring a unique, human-centered and data-driven perspective to research environments. Passionate about improving both healthcare outcomes and AI system performance, I am committed to accuracy, organization, and continuous improvement in every project I support.

Core Competencies:

- **AI Research & Data Collection:** Conducting multimodal AI studies (speech, vision, device interaction) and ensuring accurate, protocol-driven data capture.
- **Data Quality & Analysis:** Cleaning, validating, and reviewing datasets to support AI model training, product evaluation, and clinical decision-making.
- **Behavioral Assessment & Intervention:** Applying ABA principles, interpreting behavioral data, and developing evidence-based treatment plans.
- **Research Operations:** Managing participant workflows, maintaining compliance, troubleshooting devices, and supporting cross-functional technical teams.
- **Communication & Collaboration:** Effectively engaging study participants, healthcare providers, families, and tech teams to ensure coordinated project execution.
- **Participant-Centered Care & UX Insight Collection:** Gathering participant feedback, administering surveys, and representing organizational values in all interactions.
- **Technical Proficiency:** Skilled with iOS/macOS devices, command-line tools, Salesforce, Excel, Availity, and research data systems.

WORK EXPERIENCE

TELUS Digital – Los Angeles, CA | 40 hours/week

Study Moderator (AI Research & Data Operations)

11/2025 – Present

- Conduct on-site research studies for multiple AI companies, guiding participants through structured protocols used to improve AI systems, machine-learning models, and digital product performance.
- Manage end-to-end study execution, including intake, participant support, protocol adherence, accurate data capture, and secure data uploads.
- Perform real-time data-quality checks, identify anomalies, validate outputs, and ensure all datasets meet research specifications before submission.
- Support multimodal AI research (speech, vision, gesture, device interaction) and troubleshoot iOS, macOS, and consumer devices to maintain seamless research sessions.
- Collect participant surveys and usability feedback, summarizing insights to help AI product teams refine system accuracy and user experience.
- Collaborate with research and technical teams to communicate session findings, escalate issues, and make operational improvements.
- Maintain a safe, professional testing environment, following COVID-19 protocols and representing the TELUS AI brand to participants and stakeholders.

Center for Applied Behavior Analysis – Los Angeles, CA | 40 hours/per week

01/2022 – Present

Behavioral Therapist

- Collect and analyze behavioral health data across multiple sessions to inform clinical decision-making and identify trends in patient progress.
- Track intervention outcomes and collaborate with licensed clinicians to adjust treatment plans, ensuring data-driven modifications to optimize patient care.
- Develop and implement individualized treatment plans based on behavioral health assessments and data analysis.
- Communicate regularly with families to maintain consistency in care, track improvements, and provide ongoing support.
- Educate families on behavioral health strategies and techniques to promote carryover of skills in daily life.
- Apply expertise in Applied Behavior Analysis (ABA), a data-driven therapeutic model, to deliver evidence-based interventions and

drive positive patient outcomes.

- Maintained client records, ensured dignity and respect, and supported personal care needs.
- Utilize ABA principles to develop and implement effective treatment plans, monitor progress, and make data-driven decisions.

ONEgeneration – Northridge, CA | 40 hours/per week

06/2024 – 02/2025

Enhanced Care Management/Lead Case Manager

- Developed and implemented patient-centered care plans within 30 days of enrollment and updated quarterly.
- Conducted comprehensive risk assessments and identify care gaps to inform care plan development.
- Coordinated with hospital staff on discharge plans and facilitated transitional care as needed.
- Utilized motivational interviewing and trauma-informed care practices to support health behavior change and promote patient empowerment.
- Monitored treatment adherence and adjusted care plans as necessary using Salesforce.
- Skilled in chart review and auditing, with a strong understanding of Medicare and Medicaid guidelines/compliance requirements.
- Engaged patients in their preferred locations, including homes and healthcare facilities.
- Educated patients on self-management skills and collaborated with caregivers/family members to treatment goals.
- Initiated and participated in case conferences with clinical providers to ensure coordinated care.
- Maintained regular contact with enrolled patients, including at least one in-person encounter per month.
- Connected patients with social services, including housing and transportation resources, to support goal achievement and well-managed care.
- Accompanied patients to office visits according to health plan guidelines.
- Collaborated with caregivers/family members to support patient care and goal achievement.

24 Hour Home Health Care – Culver City, CA | 40 hours/per week

01/ 2019 – 01/2022

Data Analyst & Caregiver

- Refined and validated behavioral surveys and assessments for clarity, reliability, and scientific soundness.
- Applied psychometric and statistical techniques to interpret survey data, identify meaningful thresholds, and generate insights.
- Led weekly meetings, assigned tasks, and maintained project documentation to ensure project continuity.
- Collaborated with cross-functional teams to ensure alignment between research, analytics, and platform development.
- Prepared concise progress updates and recommendations for leadership.
- Used Excel to maintain care tracking logs and progress reports.
- Coordinated patient care needs with clinical documentation, family communications, and provider updates to ensure comprehensive and aligned care.

Southern California Hospitals – Culver City, CA | 40 hours/per week

01/ 2019 – 01/2021

Mental Health Technician

- Assisted licensed nursing staff in providing and documenting patient care, including activities of daily living.
- Assisted with patient monitoring, collecting behavioral observations for care team review and contributing to treatment team discussions using patient tracking data and incident reports.
- Maintained a safe and clean environment for patients, visitors, and co-workers.
- Maintained HIPAA-compliant records and supported therapeutic group activities.
- Performed clerical duties as assigned and provided basic nursing care for adult and geriatric patients.
- Adhered to Nursing Structure Standards, Hospital/Nursing Policy, and state regulatory and accrediting requirements.
- Collaborated as part of an interdisciplinary care team, communicating pertinent patient information to supervising RNs.

PUBLIC HEALTH INTERNSHIP

ONEgeneration – Northridge, CA | 20 hours/per week

01/2024 – 09/Aug 2024

Data Analyst Intern (Healthcare)

- Gathered, cleaned, and validated clinical data for internal health programs, ensuring data accuracy and integrity.
- Analyzed medical claims and service utilization reports using Availity and Excel to inform program insights.
- Supported outcomes reporting for health interventions, conducting basic trend analysis to track program effectiveness.
- Maintained accurate participant records in Salesforce, ensuring real-time data accessibility and informed decision-making.
- Participated in community outreach events, documenting participant engagement and promoting program awareness.

EDUCATION

CERTIFICATIONS

- AWS Cloud Practitioner & Solutions Architect - (2023)
- Registered Behavior Technician (RBT) - (2023)
- CPR/First Aid & Bloodborne Pathogens - (2025)
- MAB (Management of Assaultive Behavior) - (2019)
- GCP (Good Clinical Practice) - (2024)

ADDITIONAL SKILLS

- Microsoft Office Suite: Word, Excel, Outlook, Access, PowerPoint, Adobe, Project Publisher
- Management System Software: Claims Processing (Availity)
- Programming Software: Oracle
- Foreign Language: basic understanding of reading and speaking Spanish
- Data analysis and interpretation
- Communication and stakeholder engagement (e.g., reporting to management, collaborating with teams)
- Relevant training in risk management, HIPPA compliance, and environmental health and safety
